Fifth Order of Business

11/10/2016

The following report is for November to illustrate what has changed from October and what to expect through December and the coming months.

The photos this month were taken on Wednesday 11/09/16

The ponds were treated on Thursday November 3rd this month. Water levels are down significantly and we have not really had any rain in the last month. We do anticipate algae growth declining over the next few months as days are shorter and the weather turns cooler. A couple of the ponds that are really low have a submersed weed called Slender Spike rush in them along with the exposed shorelines and it was treated. Shallow Retention and Detention Ponds are always a challenge especially when we are not receiving any rain.

Thank you for your business! Sincerely,

Scott Croft

Aquagenix

Date: 11/09/16

What we found: Pond overall looks great. The Littoral Shelf was treated last month during Quarterly

maintenance.

What we did: Torpedo grass was treated around the perimeter.

What to expect: The days are shorter and there was not any Algae on this pond

Pond #100

The following report is for December to illustrate what has changed from November and what to expect through December and the coming months.

The photos this month were taken on Thursday 12-8-16

The ponds were treated on Monday December 5th this month. Water levels are still down a lot. We had a little rain on Tuesday 12-6. The (2) Larger Ponds 210 and 180 were treated for Algae and grasses and we also put in a herbicide To attack the submersed vegetation. Pond levels are still very low, but overall the ponds are in good shape.

Thank you for your business! Sincerely,

Scott Croft
